**Ingestion:** Do not induce vomiting. Call a physician or poison control center. Do not give anything by mouth to an unconscious person. Immediately transport to a medical care facility and see a physician.  
**Inhalation:** Move individual to fresh air. Get medical attention if breathing difficulty occurs. If not breathing, provide artificial respiration assistance (mouth-to-mouth) and call a physician immediately.

### 4.2 Most important symptoms and effects, both acute and delayed

**Symptoms and Effects of Exposure:** For information on potential signs and symptoms of exposure, See Section 2 - Hazards Identification and/or Section 11 - Toxicological Information.

**Medical Conditions Aggravated by Exposure:** None

### 4.3 Indication of any immediate medical attention and special treatment needed

In case of discomfort or unconsciousness: Show this safety data sheet to a physician or emergency center, treat symptomatically.

## SECTION 5: Firefighting Measures

### 5.1 Extinguishing media

Water, carbon dioxide, dry chemical, foam, or other alternatives.

### 5.2 Special hazards arising from the substance or mixture

<b>General hazards:</b>	May be combustible at high temperature. Fine particles (such as dust and mists) may fuel fires/explosions.
<b>Hazardous combustion products:</b>	Emits toxic fumes of carbon monoxide, carbon dioxide, nitrogen oxides, and chlorides.
<b>Unsuitable extinguishing media:</b>	None
<b>Specific methods:</b>	Not available

### 5.3 Advice for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

---

## SECTION 6: Accidental Release Measures

### 6.1 Personal precautions, protective equipment, and emergency response

Wear personal protective equipment to avoid exposure – see section 8. Avoid generation of dust.

### 6.2 Environmental precautions

<b>Water spill:</b>	Do not empty into drains.
<b>Land spill:</b>	Vacuum material with appropriate dust collection in place. Be aware of potential for dust explosion when using electrical equipment. If a vacuum is not available, lightly mist material and remove by sweeping or wet wiping. Wear appropriate equipment including eye protection, to avoid exposure.
<b>Release notes:</b>	If the spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities.

### 6.3 Methods and materials for containment and cleaning up

Contain dry material by lightly misting with water, followed by sweeping carefully so as not to generate dust, or vacuuming. Ensure the vacuum is fitted with an appropriate dust filter so dust is not re-introduced into the air. Be aware of the potential for dust explosion when using electrical equipment.

### 6.4 References to other sections

See section 1 for emergency contact information, section 8 for personal protective equipment details, and section 13 for disposal information.

---

## SECTION 7: Handling and Storage

### 7.1 Precautions for safe handling

<b>For large quantities:</b>	Engineering controls are recommended to ensure adequate ventilation such that exposures do not exceed TWA for an eight-hour exposure. With adequate ventilation, respiratory protection may not be needed. In the absence of adequate ventilation, suitable respiratory protection is required. The need for additional personal protective equipment including respirators, eye and skin protection should be based on a job-specific risk assessment. Additional personal protective equipment may include chemical-resistant

gloves and body covering, goggles, and face shield. Adequate eye protection is always required.

**For small quantities:** Keep dry and away from sources of ignition. Keep the container tightly closed when not in use.

**Work hygienic practices:** Facilities storing or using this material should be equipped with an emergency eyewash and safety shower. Good personal hygiene practices should always be followed.

## 7.2 Conditions for safe storage, including any incompatibilities

Store securely, inaccessible for unauthorized persons. Keep dry and away from sources of ignition. Store below 25°C (77°F) in original, unopened package or container. Product should be used within 28 days of removal from aluminum overwrap.

## 7.3 Specific end uses

See section 1.

# SECTION 8: Exposure Controls/Personal Protection

## 8.1 Control parameters

OEL for the Vancomycin is 0.02 mg/m<sup>3</sup>

## 8.2 Exposure controls

**Appropriate engineering controls:** If dust is generated, provide local exhaust ventilation to control airborne levels.

### PERSONAL PROTECTIVE EQUIPMENT:

**Eyes and face:** Wear safety glasses with side shields or goggles as appropriate when handling this material.

**Skin:** Chemical resistant gloves (nitrile or latex) and body covering.

**Respiratory:** Use an approved respirator suitable to provide level of protection required.

**Comments:** This product may cause kidney and nervous system damage from overexposure to polymyxin B sulfate, based on clinical use as described in the Physicians Desk Reference. Under conditions of overexposure, this product may be hazardous.
